

AIR INLET SYSTEMS

ANKA AIR INLET UNIT

The system is made of high quality plastic material..

insulating materials to ensure a perfect seal with the cover

Handles on the cover allowing 2-stage usage.

Stainless steel springs for positive seal.

Aluminum profiles ensuring resistance on the covers.

It has been designed as assembled for air inlets. It provides poultry with fresh air without creating cold air. During cold weathers, minimum ventilation is a well-known process. Air going through all valves moves towards the same direction. It operates as being integrated with the fans so as to keep the air pressure in the poultry house in optimum speed.

ON-OFF ADJUSTMENT SYSTEM

Mounting the wire pulling system onto the wall inlets
